

MEDboard Meeting TAS-102 in mGC Experience Sharing

Dear Colleagues,

Because there is a growing number of treatment options for metastatic gastric cancer we would like to share our clinical experience and learn from experts in the field.

For this we organize an educational meeting in Bern (29th of April, see program below). In order to intensify the learning experience we document this meeting with Medboards (desktop and mobile app), which allows to collect and share the literature and quiz questions. We also have the possibility to discuss an interesting case before the meeting. **Please notice that MEDboards allows a fully virtual participation if still necessary due to the corona virus.**

Since Servier (Suisse) S.A. is supporting this educational event we will focus also on the positive phase III trial with TAS-102.

For registration please go to our website beupdated.ch or send an email to info@beupdated.ch.

We are looking forward to meeting you in Bern.

Yours sincerely, Dr. med. Daniel Helbling
